## Lesson 2 Assignment: Create a Data flow Diagram

**Goal:** Determine the impact of training developers in Microsoft AI products/services on the trainee organization's Azure AI services consumption.

### DFD Tasks:

1. Train developers on AI topics: Generate data of developers trained on Microsoft AI products/services.
2. Extract trainee information: AI Topics trained, Trainee organization(Org.) and date trained.
3. Aggregate Azure AI services consumption data by trainee org monthly
4. View consumption data by org (trained) on timescale before and after training.
